

Adam Chois

engineerdragon01@berkeley.edu | (916)-690-1344 | [LinkedIn Profile](#) | [GitHub Portfolio](#)

EDUCATION

University of California, Berkeley

Expected May 2023

Bachelors of Science in Bioengineering | Concentration in Synthetic and Computational Biology

GPA: 3.6

Related Courses: Computational Biology, Genetic Design Automation, Linear Algebra and Differential Equations, Creative Programming and Electronics, Discrete Math and Probability Theory, Data Structures and Algorithms

TECHNICAL SKILLS

Web Development: HTML & CSS (4 yrs) | JavaScript (2 yrs) | Vue.js | React | React Native | Flutter | Bootstrap

Programming: Python (4 yrs) | Java (4 yrs) | Git (4 yrs) | TensorFlow (Keras) | SQL | MATLAB

EXPERIENCE

Genentech, Software Engineering Intern

May 2022 – Aug 2022

- Contributed to a clinical protocol automation software tool that has immediate impact on clinical trial efficiency
- Built an API that queries and downloads protocols and improves outdated healthcare document review processes
- Designed and implemented UI for authoring and amending protocols to help med-writers review and edit faster

University of California, Berkeley, Undergraduate Researcher

Sep 2021 – Aug 2022

- Developed pattern recognition algorithm for genetic fragments and phenotypic variations in *Oophaga pumilio*
- Created a support vector machine to identify new metabolites based on chemical structure of natural molecules
- Partnering with NASA to build a python library that simulates missions to Mars and a synthetic biomanufactory

Amazon, Software Development Engineering Intern (Amazon Propel Program)

Jun 2021 – Aug 2021

- Utilized internal and external AWS tools for management and security of company data and API metrics
- Developed internal APIs to improve onboarding data transfer efficiency and configuration by about 70%
- Modelled API structure with internal XML and JSON frameworks and wrote team documentation for APIs

Bayer, Quality Control Impurity Analysis/ELISA Intern

Jun 2020 – Sep 2020

- Drafted financial data spreadsheets and presentations for company executives and project managers
- Reviewed and revised research procedures and updated department's procedural Validation Master Plan
- Received professional training in Good Manufacturing Practices and laboratory Standard Operating Procedures

Google, Student Programmer (Computer Science Summer Institute)

Jul 2019 – Aug 2019

- Developed a web application for optimizing group task-management accountability using Google App Engine
- Learned about fundamental programming skills through professional development workshops and mentorship
- Gave a project presentation to Google executives about my work and the importance of great communication

PROJECTS

Housing Hound (TreeHacks Project)

- Created a web-scraper that extracts information from housing offer posts on Facebook college groups
- Hope to implement a fraud-detection feature with a built-in "offer reporting" system in the near future

Gitlet (School Project)

- Developed a simplified model of the Git version-control system with the commands found in the actual service
- Included capability of hosting collaborative repository projects, branching, and maintaining version history as well

The Unit (Google CSSI Project)

- Built a group task manager that facilitates easier task tracking in professional & non-professional organizations
- Intended features include task completion alerts, randomized task management, data visualization, etc.
